

## PHP ASSIGNMENT NR. 4

Simple user account!

Setup a new database in PHPMyAdmin, or use the create database, table etc.

The structure should be:

ID	username	Fname	Lname	email	rank	description
INT (Primary key, not NULL, Auto Increment)	VARCHAR(80)	VARCHAR(80)	VARCHAR(80)	VARCHAR(80)	INT (2)	VARCHAR(255) Or TEXT

DO THIS FIRST: You need to make an index file with an overview of all entries with:

- Buttons or links for “Edit” and “Delete”

THEN THIS:

Write a connection script that utilizes PDO.

*(Insert some entries into the database table – random data)*

### LVL 1:

Now **manipulate** the data in the database:

You need to make an **index** file with an **overview** of all entries with:

- **Buttons or links** for “Edit” and “Delete”

Write scripts that:

- Displays all current entries
- Deletes an entry
- Creates entries via a form

### LVL2:

- Updates an entry (via a form)

Add a password column to the DB Table.

You need to make a Login (password protected) that uses the table you just created for user accounts.

The login is then to an overview page of all entries with:

Nice forms and menus for all “functions”/scripts above.

- Table/list display of all entries with:
  - Buttons or links to “Edit” and “Delete”.  
(next to the list items)
- “are you sure” messages when deleting.
